After I found a lot of software in the CAD world, I found no software can make better results. So I built this company to provide users better products in CAD world. By 2004, most of the users using CAD software, software is no longer be an end design product, software needs to be meet user needs in many fields, because CAD users are not only CAD designers and CAD operators, but CAD managers and CAD system integrators. Autodesk is the first CAD software which can meet all these users needs. 5.6 years ago by 0 votes 5.6 years ago by 0 votes 5.6 years ago by 2 votes When I decided to use the world CAD in 1992, I found the

Autodesk also offers a number of tools to assist the designer and the engineering team with review and approval of 3D models, such as the Revit add-on; the native AutoCAD-based Solidworks 3D modeling tool CADX; the Easy WYSIWYG model inspection tool eXtensions (Xpress), and the non-native 3ds Max, Revit and ICE add-ons. History Autodesk started out as a computer-aided drafting (CAD) software company in 1982. Before the launch of AutoCAD, the company created a highly specialized system called CorelDRAW that was geared towards providing two-dimensional drawing and plotting functions. It was the first commercially available "point-and-click" user interface for 2-D drawing. In 1986, the company released AutoCAD, a state-of-the-art drawing program. By the following year, AutoCAD had become a standard component of the computer hardware in many architectural and engineering firms. In 1987, the company made its first real foray into 3-D modeling, creating 3D-CAD. In the late 1980s, Autodesk introduced AutoCAD LT, a freeware program aimed at the small- and medium-sized businesses market. In 1989, Autodesk licensed the software to Microsoft. On November 17, 1990, Autodesk officially released AutoCAD R14. In 1994, Autodesk introduced AutoCAD Civil 3D, a 3D design software product. In 1999, Autodesk acquired Alias-Wavefront, a 2D/3D software firm that had specialized in the D-WING product. D-WING became the basis for 3ds Max. In 2000, Autodesk bought the software development house Surfacing Technologies. Surfacing had created the AutoCAD Xpress 3D modeling product. In 2006, Autodesk bought the file-format converting software company FileMaker, Inc., developers of FileMaker Pro and FileMaker Pro Advanced, for about $11.2 million. FileMaker had developed a table-based drawing and modeling database system that could store a broad spectrum of geometric data. The system could import AutoCAD DWG, DXF, and SVG files and export to each of these formats. In 2007, Autodesk acquired SiteCAD, an OnDemand CAD service company. SiteCAD is an Autodes ca3bfb1094
